Art Unit: 3727

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 - 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over well known landscape members in view of Leguillon.

It would have been obvious to one of ordinary skill in the art to have employed a key storage slot in a landscape member such as a rock in view of the key storage slot teaching set forth in Leguillon, motivated by the ability to hide a key. It is widely accepted to hide a key under a landscape member such as a rock. To have employed a closure member for the slot would have been obvious to one of ordinary skill in the art, motivated by the retention achieved thereby when employing the slot under the landscape member. To have employed a ribbed rubber strip with an inclined end as a closure member would have been obvious to one of ordinary skill in the art, motivated by the retention achieved thereby and the ease of insertion into the slot. The particular slot shape would have been an obvious matter of design choice, producing no new and unobvious results in the above set forth device. The method claimed would have been the obvious method of making the above set forth device.
